Various [business factoring](#) options for businesses have been around for decades, recently however, Merchant Cash in Advance launched a new Merchant Factoring Loan Program that is significantly different and more effective than past programs, reports Merchant Cash in Advance.

Initially, this particular [Merchant Factoring](#) Program grants any business owner in the US a guaranteed approval regardless of credit and without collateral. The loan amount is based solely on the business's revenue over the most recent 4 months. The program has received an incredible response from business owners because of its method of payback.

The Merchant Factoring Program has grown exponentially in popularity among businesses, with many small businesses already using it for daily capital. The program gives the applicant a full 12 months to pay back the loan amount, without even asking for a social security number from the applicant.

Forgiveness on the duration of the pay back period causes this new [factoring business loan](#) program to be different than any other unsecured business loan seen before. The program launched August 1st, and has already funded over \$6 million dollars to businesses thus far.
